Our missions

NATIONALLY

Evaluate and agree safety professionals ;

Conduct studies, research and evaluations, collect and process statistics ;

Produce and distribute technical documents and benchmarks or recommendations and propose regulatory developments ;

Contribute to the promotion of techniques relating to these facilities, organise experience-sharing nationally and internationally ;

Participate in the exchanges within the scientific and technical network (RST) and organise skill-sharing.

Expertise, reactivity and rigour to ensure passenger safety.

ON BEHALF OF THE PREFECTS

Ensure technical assessment on applications for projects, particularly before commissioning ropeways and guided transports, working with the DDT (departmental directorate of the territories) which provide administrative instruction.

Ensure technical and safety controls of devices throughout their life cycle with authority delegated by the prefects.

This organisation ensures complete control throughout the entire safety process.

STRMTG is a central technical service with national competence of the ministry of Ecology Transition (MTE) attached to the Director-General of the DGITM (Directorate-general).

INTERNATIONALLY

Share our expertise and promote our skills to international bodies including:

- European standardisation bodies and working groups ;
- the Standing Committee on Regulation (EU) No 2016/424 concerning ropeways ;
- RESCOR - European controlling body ;
- ITTAB - controlling body for ropeways ;
- OITAF - International ropeways organisation
- OIPEC - International organisation for the study of cable endurance.

Train, exchange and assist international controlling bodies.

Participate in international meetings:

- TRA (Transport research arena) ;
- TRB (Transportation research board) ;
- UTF (Urban transport forum).

NB 1267

NOTIFIED BODY

In parallel with these regalian activities, STRMTG undertakes missions as a notified body. STRMTG assesses the conformity of safety components and sub-systems of cableway installations with essential requirements of Regulation (EU) 2016/424.

In 2022 the Director of the notified body became chairman of the European coordination group of notified bodies for a three-year term.
